

Plan. Prepare. Respond. Recover.

Preparedness Information. Organized.

Store, manage, maintain, and access emergency plans, guides, policies, responder documents, and operational information from one centralized platform.

Centralized • Governed • Accessible

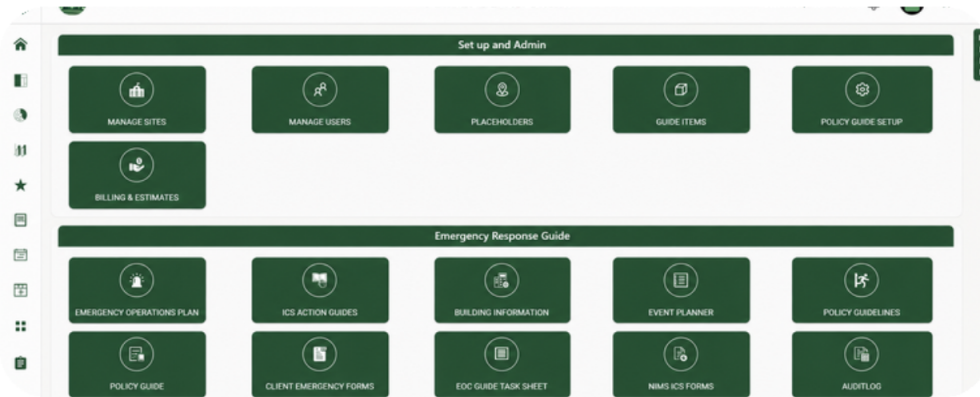

Redi4

Emergencies Don't Wait.

Preparedness information is often scattered across disconnected documents, drives, spreadsheets, and systems.

Operational Risk

One Platform. All Critical Preparedness Information.

Everything organized inside one platform.

Create. Maintain. Publish.

Author structured plans and generate consistent outputs.

EOP UI

The EOP UI interface displays a table of contents on the left and a detailed view of the '01 - Introduction' section on the right. The table of contents lists various sections including '01 - Overview and Executive Summary', '02 - Comprehensive Approach', '03 - Incident Classification', '04 - Chapter 2: Emergency Response', and '05 - Initial Incident Command'. The '01 - Introduction' section is highlighted in blue. The detailed view shows the text of the introduction, which includes a paragraph about the plan's purpose and a list of references: 'Presidential Policy Directive/PPD-8: National Preparedness[2]', 'National Preparedness System[3]', and 'National Incident Management System[4]'. The text also mentions that the plan must be consistent with regional and state plans and is based on a realistic assessment of potential hazards.

Publish

EOP PDF

The EOP PDF output shows the 'Overview and Executive Summary' section. It includes a header with 'Version: 0' and 'Date Issued: Draft'. The section title is 'Overview and Executive Summary'. The text of the introduction is displayed, followed by a list of references: 'Presidential Policy Directive/PPD-8: National Preparedness[2]', 'National Preparedness System[3]', and 'National Incident Management System[4]'. The text also mentions that the plan must be consistent with regional and state plans and is based on a realistic assessment of potential hazards. The references are listed at the bottom of the page.

Governance. Compliance. Consistency.

Controlled guidance. Consistent execution.

Policy Editor

The screenshot shows a web-based editor for a policy document. The title bar reads "Policy Guidelines - Gate Entry & Exit Policy". The main content area is divided into two sections: "Policy" and "Emergency Guidelines". The "Policy" section contains a paragraph of text starting with "It is the policy of [Placeholder: Client Name] to regulate the entry and exit of all persons, vehicles, and goods through designated gates to ensure the safety, privacy, and security of residents." The "Emergency Guidelines" section contains a list of actions to be taken in case of a security breach, suspicious entry, or emergency.

Publish Policy

Policy PDF

The screenshot shows the final PDF output of the policy. The title is "P015 : Gate Entry & Exit Policy". The date is "Last Updated: Apr 01, 2025". The content is the same as the editor, but formatted as a PDF. It includes a "Policy" section and an "Emergency Guidelines" section.
